

January 2020

PLEASE READ BEFORE USING YOUR LIMPET

You can access the **Quick Start Guide** using this code:

1. First of all, plug the motor (or any other peripheral you plan to use to the controller)
2. Then power the Limpet using a suitable power supply (or battery) – 12V d.c.

Should you find any packing related problem, please contact the dealer you purchased your unit from.

For technical support, you can always find us at www.lunatico.es.
